Re: Soil sampling at Hickory Hills West

Dear Mr. Gerson:

This letter confirms our conversation wherein you informed me that the U.S. Environmental Protection Agency (USEPA) could access property owned by Hickory Hills West for the purpose of collecting soil samples. USEPA intends to conduct the sampling on the morning of November 14, 1991. We will meet you at the sales office located off route 940 at 10:00 a.m. prior to entering property owned by Hickory Hills West.

USEPA is collecting additional soil samples on property owned by Hickory Hills West upon the recommendation of Congressman Paul Kanjorski. USEPA believes that the existing analytical results from samples collected on Hickory Hills West property indicate that this property has not been impacted by the C&D Recycling Site.

USEPA will collect a sample from the upper six inches of soil and from the upper one inch of soil at a maximum of two locations. The amount of soil to be removed would approximately fill a one gallon milk bottle. USEPA will forward results to you at the above address.

Thank you for your cooperation.

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Towle".

Michael Towle,
Remedial Project Manager
